

Modern Travel Centers

Full-Service Interstate Travel & Truck Stop Infrastructure – Gateway East & Gateway West

The truck stop and travel center opportunities represent a modern reimagining of interstate travel infrastructure. Designed to serve commercial drivers, RV travelers, and tourism traffic alike, these facilities can include premium fueling services, dining, retail, maintenance, trailer accommodations, and hospitality amenities within highly visible gateway locations.

By elevating the traditional truck stop model into a full-service travel destination, the projects create long-term commercial value while supporting the broader resort ecosystem and regional transportation network.
